

DNA Analysis Form

Horse's Name _____

Registration Number _____ Date of Birth ___/___/___

{ } mare { } stallion { } gelding Color _____

Sire _____ DNA# _____ Reg.# _____

Dam _____ DNA# _____ Reg.# _____

The purpose of the DNA sampling is to verify parentage and to identify the DNA type for the individual horse. The information received from the test will be held by the Gypsy Vanner Horse Society and the University of Kentucky. The University of Kentucky may use the samples in its research. The GVHS does authorize the University of Kentucky to share this DNA information with certain other registries as needed to verify parentage.

Hair samples are collected by pulling (not cutting) either mane or tail hairs so that the root bulb is left intact. Attach with tape approximately 50 hairs with root bulbs to the bottom of this form. DNA testing is required by the GVHS (except for geldings) and no registration will be issued without the results.

Mail this form and hair sample to:

University of Kentucky
Animal Genetic Testing & Research Lab
Department of Veterinary Science
108 Gluck Equine research Center
Lexington, Kentucky 40546-0099

I hereby certify the identity of the horses listed above as being the same horse pending temporary certificate or registration for entry in the stud book of the GVHS..
